

Structured Wiring Box

ELK-SWB28

Multi-purpose cabinet for structured wiring, controls, & peripherals. Versatile mounting for multiple manufacturer's structured wiring modules; such as Leviton, OnQ, OpenHouse, and others. May be flush or surface mounted. Flush mounting is ideal for hollow frame walls with studs on 16" centers. The minimum rough opening is 14.25" wide, 28.25" high, 4.5" deep. Can be adjusted for varying wall finish thicknesses and the locking, removable hinged lid extends beyond the box edges approximately 5/8" which easily conceals uneven cutouts of the wallboard edges. It's universal design features a hole-slot-hole mounting system that allows it to accommodate shelves, brackets, wire modules and equipment from many different manufacturers.
